

Student Research Workshop Program

Wednesday, July 10

8:45-9:00 Welcome

9:00-9:30 *Extracting Attributes and Their Values from Web Pages*
Minoru Yoshida

9:30-10:00 *Cross-Language Information Retrieval via Hybrid Combination of Query Expansion Techniques*
Fatiha Sadat

10:00-10:30 *A System for Checking NP Agreement in German Texts*
Gerhard Fliedner

10:30-11:00 *Resolving Attachment and Clause Boundaries Ambiguities for Simplifying Relative Clause Constructs*
Advait Siddharthan

9:00-9:30 *A Comparison of Probabilistic and Non-Probabilistic Anaphora Resolution Algorithms*
Judita Preiss

9:30-10:00 *Controlling Linguistic Coreference in Graphical Interfaces*
Jill Nickerson

10:00-10:30 *A compositional approach to short answers in dialogue*
David Schlangen

10:30-11:00 *Automatic Pronunciation of Proper Names using Language Origin Classes and Unsupervised Clustering*
Ariadna Font Llitjós

9:00-9:30 *Analysis for Speech Translation Using Grammar-Based Parsing and Automatic Classification*
Chad Langley

9:30-10:00 *DSG/TAG: An appropriate grammatical formalism for flexible sentence generation*
Raymond Kozłowski

10:00-10:30 *Recurrent Probabilistic Modeling and Its Application to Part-of-Speech Tagging*
Gerald Chao

10:30-11:00 *Machine Learning of Lexical Inheritance Hierarchies: Linguistic Plausibility vs. Minimal Redundancy*
Caroline Sporleder
